PERFORMANCE PARTS
FOR LAND, AIR, AND WATER

**YOUR #1 SOURCE FOR
SUPERIOR QUALITY
PERFORMANCE PARTS**

TECHNOLOGY

In an industry driven by technology, we continue to set the standard for precision building components and supplies. For over two decades, we have earned a solid reputation as a leader in the performance market.

QUALITY

We provide superior service, quality products, and competitive pricing. With the globalization associated in business today, our core commitment remains the same - **Quality**. Featured in this new catalog you will find only premium quality products, chosen to compliment one another.

SERVICE

Give us a call - our staff of seasoned pros are here to help provide you with a competitive advantage, and the economy of one stop shopping. It is our goal to embrace change and be responsive to you as we strive to meet and exceed your needs.

CONTACT INFORMATION

TOLL FREE: 800-530-9494

Call our toll free order line at 800-530-9494 for quick, friendly service and processing of your order. Order line open Monday-Friday, 9 AM - 5 PM EST

FAX: 231-873-0218

Fax your order 24 hours a day for convenient processing. Make sure to include your phone #, fax #, company information, part numbers, and shipping requirements. All orders received via fax are confirmed via fax.

WEBSITE: www.ChassisShop.com

Our recently revised E-Commerce website provides simplified ordering and "real time" information. Also, find product information, photos, and answers to technical questions. Have additional questions, email us at tech@ChassisShop.com.

TECH LINE: 231-873-3640

Get the expert technical help you need by calling 231-873-3640. Our staff combines years of racing experience and engineering knowledge. Tech line open Monday-Friday, 9 AM - 5 PM EST. Tech questions can also be emailed to tech@ChassisShop.com.

MAIL:

Orders and questions can be mailed to us at:
The Chassis Shop Perf. Prod. Inc.
1931 N. 24th Avenue
Mears, MI 49436

SHOWROOM:

We are located near the Silver Lake Sand Dunes on the beautiful Lake Michigan Shoreline. Browse our showroom open Monday-Friday, 9 AM - 5 PM EST.

TABLE OF CONTENTS

Tubing / Plate	65	Pedals
1 Drop Boxes, Plate, Welding Rod	66	Brake Calipers, Brake Pads
2 Tubing	69	Residual, Proportioning Valves
4 Chromoly Bar	70	Brake Fittings, Brake Locks
Chassis Fabrication	71	Disc Brakes
5 Custom Bend Information	Cables / Accessories	
7 Pre-bent Tubing	78	Cables
9 Tube Adapters	79	Cable Hardware
11 Jam Nuts, Nylocks, Washers	81	Chute Cable Kit
12 Rod Ends	Exhaust / Intake	
14 Rod End Accessories	82	Bends, Donuts
15 Tabs, Brackets	83	Combo Bends, Straight Tubing
22 Motor Plates and Accessories	84	Blow Off Valve, Intakes
Body Fabrication	85	Flanges, Gaskets
25 Panel Fasteners and Accessories	Plumbing	
28 Clecos	86	Weld In Bungs
29 Access Doors, Latches, Seats	87	Hose, Flame Guard
30 NACA Ducts	88	Clamps, Separators, Wrenches
31 Dragster Noses, Windscreens	89	Hose Ends
32 Canards, Front Wings	92	Pipe Adapters, Teflon Tape
33 Rear Wings	94	AN Adapters
34 Wing Strut Kits	96	O-rings, Seals, Washers
35 Slot Clevises, Quick Pins	97	Filters, Shut Offs
36 CO2 Bottles	98	Hard Line, Pre Assembled Hose
37 Clamps, Mounts	99	Steel Hose Ends
38 Bottle Mounts	100	Steel Pipe Adapters
39 Fill Caps	102	Tech Information
Driveline / Suspension	Electrical	
41 Lateral Limiter, Torsion Kits	104	Timing, Wiring
42 Wheel Adapters, Housing Ends	105	Fuse Centers, Switch Panels
43 Shocks	107	Wire
46 Springs	108	Connectors, Switches
Steering / Controls	109	Battery Connectors
47 Steering Shaft Kits, Front Axles	110	Gauges
48 Spindles, Hubs	120	Gauge Accessories
49 Anti Push Backs, U-Joints	Safety	
50 Steering Wheels	121	Belts, Restraints
51 Quick Releases	124	Parachutes
52 Rack N Pinions, Steering Bearings	125	Chute Cable Kit
53 Rack N Pinions	Apparel / Manuals	
Brakes / Hydraulics	126	Chassis Shop Apparel
55 Master Cylinders, Slave Cylinders	127	Pro-Werks Apparel, Manuals
58 Master Cylinder Reservoir	Trailer Accessories	
59 Hand Brakes	128	Cradles, Stabilizers
60 Brake Levers, Control Levers	129	Tie Downs
61 Brake Pedals		

TUBING/PLATE

ALUMINUM PLATE

Aluminum plate is 6061-T6, ideal for fabricating mounting plates and lightweight brackets.

Aluminum

Chromoly

CHROMOLY PLATE

Chromoly plate is aircraft 4130 condition N, perfect for fabbing those custom brackets for your project.

PART #	SIZE	THICKNESS	#/ SQ. FT.	PRICE
6061-18	12" x 12"	.125"	1.76	\$13.01
6061-316	12" x 12"	.190"	2.68	\$19.82
6061-14	12" x 12"	.250"	3.52	\$25.14
6061-38	12" x 12"	.375"	5.36	\$56.54
C52-302	24" x 24"	.250"	3.52	\$93.95
C52-303	24" x 24"	.375"	5.36	\$139.95

DROP BOX

An assortment of our chromoly "drop" pieces of tubing. Each 10# box may contain an assortment of round, square, rectangle or streamline tubing, and bar or plate. These drop boxes are very useful for a variety of projects. Subject to availability.

PART #	DESCRIPTION	PRICE
C63-001	CHROMOLY DROP BOX	\$29.95

ALUMINUM DROP BOX

This assortment box of aluminum contains 10# of random pieces of plate, bar, or tubing. The aluminum alloy is undetermined. These drop boxes are useful for a variety of projects. Subject to availability.

PART #	DESCRIPTION	PRICE
C63-004	Aluminum DROP BOX	\$29.95

PART #	SIZE	THICKNESS	#/ SQ. FT.	PRICE
4130-116-9-12	9" x 12"	.063"	2.57	\$18.96

4130-14-18-72	18" x 72"	.250"	10.21	\$606.36

Note: Cut tolerance on this material is + or - 1/4".

WELDING FILLER ROD

This #65 triple deoxidized filler rod is the choice of many leading chassis builders for chromoly and mild steel tig welding. Aluminum filler rod is available for two different applications.

#65 FILLER ROD				
PART #	SIZE	APPLICATION	# PCS/ BUNDLE	PRICE
C73-002	1/16" x 36"	*	34	\$5.99
C73-004	3/32" x 36"	*	14	\$5.99

ALUMINUM FILLER ROD				
PART #	SIZE	APPLICATION	# PCS/ BUNDLE	PRICE
C73-006	1/16" x 36"	3003 ALUM ALLOYS	75	\$13.99
C73-007	3/32" x 36"	3003 ALUM ALLOYS	40	\$13.99
C73-008	1/16" x 36"	5052, 6061 ALUM ALLOYS, 6061 TO 3003, MOST CASTINGS	75	\$13.99
C73-009	3/32" x 36"	5052, 6061 ALUM ALLOYS, 6061 TO 3003, MOST CASTINGS	40	\$13.99

*When properly used this material is compatible with mild steel to mild steel, chromoly to chromoly, and mild steel to chromoly.

Note: All welding should be performed by a trained and experienced welder.

Standard full length is 12', may be cut to order.

TUBING

We specialize in "Domestic Drawn" premium material, processed in the U.S.A.

ROUND CHROMOLY TUBING

In addition to our specialty shapes, we offer a large selection of premium quality round chromoly tubing. The round chromoly is 41 30 condition N and built to MIL T 6736 B specs. We purchase this material in large quantities and pass the savings on to you. Our large in stock inventory is priced right for small orders with additional discounts on full lengths, quantity discounts as listed. See page 4 for information on lengths and shipping.

41B-114	1-1/4"	3.004	\$16.20

SHIPPING INFORMATION

NOTE ON LENGTHS AND SHIPPING

FULL LENGTH DISCOUNTS

The special discount pricing listed is available when purchasing full lengths. Different sizes (part #'s) cannot be mixed to receive the multiple length discount. Chromoly tubing comes in varying random lengths ranging from 17' to 24' long. If you order 3 "Full Lengths" of tubing, you may receive 3 different lengths that are between 17' to 24' long. We cannot guarantee specific lengths for your order. (Example: Piece #1 is 18'-2", Piece #2 is 20'-1", Piece #3 is 23'-6") Full Random Lengths must be taken to receive full length pricing.

UPS SHIPPING

UPS is usually the fastest and most economical way for us to ship. When taking advantage of full length discount pricing, specify "Full Length cut 8' plus drop". We can also cut to lesser lengths within reason. The additional UPS handling charges may be avoided with orders cut 48" or shorter.

TRUCK SHIPPING

Tubing over 8' long requires truck shipment. When using truck shipment, you will receive full random uncut lengths. All orders are carefully packaged for safe shipment. We work hard to find the lowest possible shipping cost for all truck orders.

FREE FREIGHT

All tubing orders totaling \$2300 or more are eligible for pre-paid freight, per our routing to one destination in the continental United States. This program is subject to invoice payment within the account terms.

CHASSIS FABRICATION

HOW BENDS ARE MEASURED

The degree of a bend may be measured with either a protractor or an angle finder.

BEND INFORMATION

The bend radius is measured on the "centerline" of the tube. Radius is determined by the tooling available. The leg length is the straight portion, starting from the tangent point (where the bend starts).

For bend radius, maximum degree of bend, minimum leg length, and minimum wall thickness information, please refer to the "custom tube bending" chart on page 6.

EXAMPLES

OBTUSE ANGLE

ACUTE ANGLE

RIGHT ANGLE

PARALLEL

CUSTOM TUBE BENDING

We offer custom tube bending of our material. Our minimum basic single bend cost is **\$25.00** per bend plus material. Complex pieces requiring additional layout time will be charged accordingly. Our sales people can provide assistance and quoting. Mail or fax us a drawing using the information listed on the chart below as your guide on our available tooling. Allow 5-10 working days for scheduling.

TUBE DIA.	BEND RADIUS	MIN. WALL THICKNESS	MIN. LEG LENGTH	MAX. DEGREE OF BEND
3/8"	15/16"	.035"	1-1/2"	180
1/2"	1-1/2"	.035"	2"	180
3/4"	4"	.049"	3"	120
7/8"	4"	.058"	3"	120
1"	5-1/2"	.058"	4-3/4"	180
1-1/8"	5-1/2"	.058"	4-7/8"	180
1-1/4"	6"	.058"	5"	180
1-3/8"	6"	.058"	5"	180
1-1/2"	6"	.065"	7"	180
1-5/8"	7"	.065"	7-1/2"	180

Custom bending is performed for the diameters listed above only.

C72-157*	3' PAD (5/8" THK)	1" TUBE	\$37.95

* Does not include Velcro.

PRE-BENT CHROMOLY CAGES

If you're building a new car or updating your current race car, these affordable pre-bent chromoly pieces are perfect for the professional chassis builder and the do-it-yourselfer. You may choose from our standard cage kits or individual pieces, which will fit most installations. We also offer custom cage kits built to your specifications.

PART #	DESCRIPTION	TUBE SIZE	RADIUS	PRICE
C42-270	5 PT	1-1/2" x .065"	6"	\$135.95
C42-271	5 PT	1-5/8" x .083"	7"	\$155.95
C42-274	6 PT	1-1/8" x .058"	5-1/2"	\$124.95
	JR DRAGSTER			
C42-275	6 PT	1-1/2" x .065"	6"	\$188.95
C42-276	6 PT	1-5/8" x .083"	7"	\$211.95

Note: 1-1/8" dia. cages are bent on a 5-1/2" radius, 1-1/2" dia. cages are bent on a 6" radius and 1-5/8" dia. cages are bent on a 7" radius. All kits include our standard pre-bent chromoly tubing.

LEFT HAND ROUND TUBE ADAPTERS

These weld-in threaded tube adapters are perfect for construction of linkage and suspension components. Adapters are CNC machined 4130 chromoly to precise tolerances with a jewelry quality finish. Left hand tube adapters are marked with grooves for easy identification during assembly. Left hand tube adapters with hex option also available in select sizes.

RIGHT HAND ROUND TUBE ADAPTERS

These weld-in threaded tube adapters are perfect for construction of linkage and suspension components. Adapters are CNC machined 4130 chromoly to precise tolerances with a jewelry quality finish.

TWO PIECE "C" SERIES (MILD STEEL)

The "C" Series consists of a low carbon steel body (zinc plated) and precision ground oil impregnated sintered steel ball. This construction allows the rod end body to carry a greater static load and offers greater misalignment capabilities.

Buy 10 Aurora Rod Ends and SAVE an additional 10% off retail price, mix & match.

TECH TIP

RADIAL STATIC LOAD CAPACITY?
 These loads are based upon the minimal mechanical properties of the design configuration of the stressed areas. The Operation Load Capacity of Aurora rod ends is based upon the Radial Static Load Rating. Appropriate safety factors should be utilized with the application. Full rotation assemblies up to 100 rpm should not exceed 10% of the radial static load.

AXIAL LOAD CAPACITY?
 Axial static load is the force that is applied through the bore of the ball. Maximum axial static load capacity is recommended at 15% of the radial static load for Aurora two piece rod ends, 10% for three piece rod ends.

BEARING MISALIGNMENT?
 A rod end or spherical bearings ability to misalign is measured by the degree of angle the ball can accommodate without interference.

ROD ENDS

THREE PIECE "A" SERIES (CHROMOLY)

The "A" series consists of a body, ball and race. This type of construction allows for the use of different metals for each component part. The body is manufactured out of 4130 steel alloy, which is heat treated, cadmium plated and chromate treated. Specifications for the race are heat treated alloy steel, zinc plated, and chromate treated materials. The ball is made from 52100 steel (AMS-7440) and is heat treated, and hard chrome plated.

HIGH MISALIGNMENT SERIES (CHROMOLY)

These special high misalignment rod ends are based on the "XA" series. Assembled with a special ball that includes built in shoulders, providing additional misalignment without the use of spacers. The durable Teflon liner provides additional wear resistance.

TECH TIP

PTFE LINER?

The military spec Teflon race greatly increases dynamic wear characteristics, making this the ideal choice for 4-links and ladder bars. This PTFE lined option is not to be confused with other rod end manufacturers' soft Nylon races.

ROD END INSERT

Perfect for shock end bearings and components that don't need adjustability.

MILD STEEL / BRACKETS

TECH TIP

Mild Steel can be successfully welded to chromoly using the proper filling rod (see pg. 1). Always select chromoly tabs for applications requiring ultimate strength.

FRONT AND MID MOTOR PLATES

All of our Motor Plates are 6061-T6 aluminum, CNC precision machined "In House" to exact tolerances for optimum fit and finish.

PROFILED MID MOTOR PLATE

Designed to work with Pro-werks Profiled Front Motor Plates, this mid plate is ready to install. Available for either 1-1/4" or 1-1/2" diameter frame rails, plate has 19-1/2" centers on frame rail notches. Includes Chevy dowel pin locations, 6" diameter center hole, and two 2" diameter vent holes.

PROFILED FRONT MOTOR PLATE

Plate is ready to install and is complete with holes for chassis tabs. Notched at 1-3/8" diameter to accept floating saddle mounts or direct mounts, plate has 19-1/2" centers on frame rail notches.

FLOATING SADDLE MOUNT

This all chromoly constructed mount is tig welded. Clamps are sold separately; see Pro-werks Stainless Steel Clamp at right.

STAINLESS CLAMP

Positive grip band clamps are ideal for floating saddle mounts, add-on brackets, or hose sealing. Fine thread t-bolt includes self-locking nut. Two clamps recommended for most applications.

AUTO ADAPTER PLATE

This aluminum plate adapts Chevy Powerglide Turbo 350 or 400 transmissions to a VW air-cooled engine. Includes transmission dowel pins to ensure accurate alignment. Measures 1/4" thick, 18-1/2" tall, and 20" wide.

PART #	DESCRIPTION	PRICE
C12-300	AUTO ADPT PLATE	\$195.95

BODY FABRICATION

PANEL FASTENERS

These self-locking fasteners are widely used for fastening panels and hoods. They provide an easily operated, positive acting, shake proof fastener. Several styles to choose from. All are functional for steel, aluminum, and fiberglass installations.

BUTTONS

Accepts C73-505-10, C73-508-10, or C73-510-10 tabs with C73-525-10 springs.

FLAT

DOME

TECH TIP HOW TO MEASURE GRIP LENGTH If you are trying to match existing buttons on your application, follow these illustrations to determine the correct measurement. Grip length is measured from the rim surface in contact with the surface of the panel (A) and the actual fastened point of the spring (B). Diameter is (C).

TABS & SPRINGS

An assortment of tabs to choose from for your panel fastener installation.

FRONT CANARD WINGS

Durable all aluminum construction includes superior quality CNC machined ribs, measuring 10" deep. Available with wind tunnel proven NACA profiles. Mount tube is 1" outside diameter and aluminum skin is .032" thick. Wings are offered with three different tip plate profiles. Ribs are not available separately.

CANARD WINGS WITH INNER AND OUTER TIPS

For applications requiring inner and outer tip plates. Tip plate style "B" shown below.

Without inner tip plates for profile fit to body.

Wing Tip profiles

All tip plate profiles designed for equal performance.

Assembled with billet CNC machined ribs.

CANARD WINGS WITH OUTER TIPS

Overhang is 1-1/2". May be trimmed to match body contour. Wing tip profile "C" shown below left and style "A" shown below right.

All tip plate profiles designed for equal performance.

REAR WINGS

Rear wings are built with CNC machined ribs and durable .032" thick aircraft aluminum skin using wind tunnel proven NACA wing profiles. Ribs have 15" cord length and wing is complete with internal reinforcement tubes. The 3/16" thick mount tabs have 3/8" diameter front and 5/16" diameter rear holes with 5-7/8" spacing. Tip plates are removable, interchangeable, and the profiles available are designed for equal performance. The ribs are not available separately. We can custom build wings up to 70" wide.

BAR / NECK / UNIVERSAL MOUNTS

UNIVERSAL CLAMP

Provides secure mounting of remote reservoirs for shock absorbers without cylinder distortion. May also be used for fuel pumps, filters, exhaust pipes, etc. The micro-polished aluminum clamp may be flat mounted or accepts Pro-werks Bar Mount for clamping on round tubing. Clamp has two 1/4"-20 threaded mount holes with 2-5/8" spacing, measures 1/2" thick.

SOLD INDIVIDUALLY

BOTTLE MOUNT

Perfect for nitrous, CO2, and fresh air bottles. May be mounted on tabs or flat surface. Accepts Pro-werks Bar Mount for clamping on round tubing. Micro-polished 6061-T6 billet aluminum is CNC machined for accuracy with a lightweight, attractive design. Mounts have smooth radiused outside corners and two 1/4"-20 threaded mount holes with 2-5/8" spacing, measures 1/2" thick. The easy spin knob provides positive, secure clamping and quick bottle loading. Mounts are required by most sanctioning bodies and two mounts per bottle are recommended. The diameter listed is the actual bottle diameter. The clamp range is less than 1/16". To ensure proper fit, measure bottle before ordering.

WHY KONI SPA-1?

The Koni SPA-1 series oil-filled shock absorber (for drag racing only) is a complete departure from the "90/10" thinking which is no longer effective in modern drag race competition. The old thinking was to allow the vehicle front end to rise quickly and stay there to promote as much weight transfer as possible to the rear wheels. This was achieved by virtually no rebound forces ("10") and a great deal of bump forces ("90"). This massive amount of bump force was supposed to hold the front suspension up to maintain that "bite." Only one problem. That nose-in-the-air attitude trapped huge volumes of air which ruined any attempt at aerodynamics so E.T.'s were not as good as they could have been. Koni SPA-1 series shocks deal with this in several ways. First, they use virtually no bump (compression) dampening. Why? To allow the front-end to settle quicker, restoring the nose down attitude that is so essential for cleaner air flow. Second, the rebound (extension) forces are velocity sensitive; that is, they increase at a rate directly proportionate to piston speed.

HOW TO DETERMINE THE CORRECT SHOCK ABSORBER LENGTH

Observe the following three guidelines when determining the correct shock absorber length for your vehicle.

1) Preparing the Car:

Place the car body on a level surface and remove springs, shock absorbers, bump rubbers, and sway bar(s).

2) Determining the Maximum Length:

Raise the car body until the tires are lifted off the ground. Take careful note of which component of the suspension is limiting the suspension from traveling further. Raise the tire enough to prevent that suspension component from binding. Measure between the center of the upper and lower shock mounting points. This gives you the desired maximum length shock.

3) Determining the Minimum Length:

Lower the car to the point at which the tub just touches on the pavement, or a tire just touches on the inside of the fender well, or until some other suspension component uses up all its available travel. Measure between the center of the upper and lower shock mounting points. Now select a KONI shock with a minimum which is shorter than your measured minimum suspension length. By choosing a slightly shorter shock you protect the shock from bottoming out and causing internal damage.

HOW TO DETERMINE SPRING RATE

1) Determining Travel:

It is recommended that there be approximately 3" of compression travel available (including the bumpstop). This means the chassis must be supported by a spring rate that will allow the chassis to be supported 3" upward from the bottoming position.

2) Determining the Vehicle Sprung Weight:

Establish front and rear weight of the vehicle. Establish unsprung weight. This is the weight not supported by the springs. i.e., tires, wheels, wheelie bars, brakes, and 1/2 of the weight of the shock, spring, driveline, and ladder bar or four link. 1/2 the weight is used for some components because their weights are equally shared between sprung and unsprung weight. Determine spring weight, that is the weight of the vehicle less the unsprung weight.

3) Determining Spring Rate:

Divide the rear sprung weight by 2 to determine the load for each rear corner. Divide the front sprung weight by 2 to determine the load for each front corner. If the load for the rear corners is 330 lbs. each ($660 \text{ lbs.} / 2 = 330 \text{ lbs.}$) then divide the 330 lbs. by the compression travel needed and you arrive at the base spring rate of 110 lbs. per inch. Ex: $330 \text{ lbs.} / 3" \text{ compression travel} = 110 \text{ lbs. spring rate.}$

SHOCKS

8216 SERIES SHOCK SINGLE EXTERNAL ADJUSTABLE

New aluminum construction with externally adjustable rebound control. Features SPA-1 valving adjustable spring platform and accepts 2 1/2" I.D. spring. The rod end inserts have a 1/2" I.D.

FRONT AXLE

Precision-machined chromoly axle is tig welded and spindle bosses are mounted at an 8 degree angle to accommodate spindles. Width dimension is measured from center of tire to center of tire. Drop dimension is measured from bottom of axle to centerline of spindle. Stiletto bosses measure 2" tall and SPE bosses are 1.875" tall.

C42-624	DUST CAP	1 SEAL	\$8.95

U-JOINTS / ANTI-PUSH BACKS

C42-362

BLOCK AND PIN U-JOINT

These non-sealed high alloy quality U-Joints are strong enough for moderate load applications. Not recommended for front engine or heavy load steering applications. They offer a 35 degree angle of operation.

PART #	DESCRIPTION	PRICE
C42-362	3/4" I.D. BORED x 3/4" I.D. BORED	\$51.95

HEAVY DUTY ROLLER BEARING U-JOINT

These durable and dependable smooth operating U-Joints are ideal for high load applications. They are sealed and offer a maximum of 32 degrees of operating angle.

ANTI PUSH BACK

Available for 5/8" or 3/4" diameter shaft. Pilot drilled for two-piece shaft construction. Safety feature required by NHRA.

PART #	DIA.	PRICE
C42-350	5/8"	\$35.95
C42-351	3/4"	\$35.95

Anti Push Back when positioned in front of cross support limits steering column travel. Also can serve as coupler for two piece steering column if needed.

PART #	I.D. BORED x I.D. BORED	APPLICATION	PRICE
C42-365	5/8" x 5/8"	UNIVERSAL	\$54.95

COMPACT REMOTE COMBINATION MASTER CYLINDER KIT

Wilwood compact combination master cylinders have been fully redesigned for limited space applications requiring the output capacity of a full size master cylinder. The black E-Coated aluminum body has a compact length of 3.37" and an 1/8" NPT outlet.

ALUMINUM TANDEM CHAMBER MASTER CYLINDER

Wilwood tandem chamber master cylinders represent the latest refinements in brake pressure actuation and fluid control. The exclusive Wilwood features incorporated in this innovative and unique design make it the perfect choice for a wide range of custom manual or power brake applications.

864-3	3	CLUTCH, BRAKE, & THROTTLE	\$77.00

ADJUSTABLE PEDAL MOUNTING PLATE

This mounting plate has three different locations for the pedal assembly, with an overall adjustment of 4". It can be used with all dual cylinder pedal assemblies, includes quick change cable mount for Morse cables.

PART #	DESCRIPTION	PRICE
1222-CT	ADJUSTABLE PEDAL MOUNTING PLATE	\$47.20

PEDALS / MOUNTS

DRAGSTER PEDAL ASSEMBLY

Lightweight yellow zinc-plated chromoly pedals glide on a nylon bushed aircraft aluminum cross shaft. Multiple snap ring grooves enable side to side positioning of pedals on shaft, total adjustment is 1-1/4" per pedal in 1/4" increments. Standard features include non-skid surface on brake pedal and toe hook style gas pedal. Assembly includes chromoly mounting tabs and hardware.

Dragster Pedal Kit

MULTI MOUNT BRACKETS

Optional weld mount brackets allow a total of 6" of pedal assembly adjustment in 3/4" increments. Laser cut 1/8" thick chromoly with 5/16" diameter holes.

PART #	DESCRIPTION	QTY. PER PACK	PRICE

CALIPERS

BILLET SPOT CALIPER

Single action floating caliper, precision computer machined from billet aluminum. Only 1.2 lbs. 3-5/16" bolt centers. Accepts up to .38" thick rotors, universal application, right or left.

PART #	DESCRIPTION	PRICE
120-1064	BILLET CALIPER	\$101.80

PART #	PAD	PRICE
150-1251-K	(4) SOFT ROUND	\$31.01
230-1112	SPOT PAD SCREW	0.37/EA

BILLET ALUMINUM CALIPER

Super compact dual action design. Machined from 7075-T6 billet aluminum. Features internal crossover passages. 3/16" dia. cross bolt retain pads.

PART #	SIDE	PRICE
623-R	RIGHT	\$108.30
623-L	LEFT	\$108.30

Right side shown, 3.250" bolt pattern, 1/8" NPT inlet port.

DYNALITE SINGLE

DYNALITE/DYNAPRO SINGLE PADS

For use in part numbers 120-2498, 120-3277, 120-9687, 120-9689, 623-R, 623-L.

PACK OF (4)	DESCRIPTION	PRICE
15E-9820-K	POLYMATRIX "E"	\$60.57
15O-9764-K	"SMART PAD" BP-10	\$41.28
15O-9766-K	"SMART PAD" ALUMINUM ROTORS	\$45.09

MECHANICAL SPOT CALIPER

Features single piston floating housing which permits use in small, compact applications. Ideal for parking brake. Mechanical cam-actuated lever with two settings for adjustment. Only 1.6 lbs. Pads included. 2.95" mount centers. Accepts up to .50" thick rotors.

PART #	MECHANICAL CALIPER	PRICE
120-2373	RIGHT	\$62.94
120-2374	LEFT	\$62.94

PART #	PAD	PRICE
150-5982	SPOT	\$7.29

Right side shown.

BILLET SPOT

DYNALITE SINGLE FLOATER

Single piston housing of billet aluminum permits use in small, compact applications. Only 1.4 lbs. Open back allows for quick pad change- accepts Dynalite Single pads. Has 3.28" bolt centers. Universal application, right or left.

PART #	FITS	PRICE
120-2498	1/4"	\$101.80
120-3277	3/8"	\$97.60

BILLET DYNAPRO SINGLE

Dual action 2-piston caliper has the lowest possible weight, only 1.4 lbs. Stainless steel pistons for a 300% reduction in heat transfer. Accepts 6" to 13" dia. rotors up to .38" thick. Universal application, right or left.

PART #	BOLT	PRICE
120-9689	3.750"	\$103.82
120-9687	3.250"	\$103.82

DYNALITE II

Weighing only 2.7 lbs., this compact design 4-piston caliper is ideal for a wide range of braking applications. Black anodized aluminum with stainless steel pistons, accepts 9" to 15" dia. rotors, 5.25" bolt pattern with 1/8" NPT inlet.

Right side shown.

For use with Quick-E-Clip style calipers, part numbers 120-9695 and 120-9693.

PACK OF (4)	DESCRIPTION	PRICE
15E-9837-K	POLYMATRIX "E"	\$67.08
150-9136-K	"SMART PAD" BP-10	\$46.60

BRAKE PADS / CALIPERS

BILLET DYNAPRO

Powerful and compact, 4-piston rigid design produces incredible brake torque at minimum weight under 2.5 lbs., universal with multiple bleeders. May be used on right or left side. Accepts 9" to 15" dia rotors, 5.25" bolt pattern with 1/8" NPT inlet.

ROTOR		
PART #	THICKNESS	PRICE
120-9695	.38"	\$155.22
120-9693	.81"	\$155.22

PS-1

Compact and lightweight (only .93 pounds), this caliper combines the strength of cast aluminum construction with a sleek low profile design. Caliper utilizes two stainless steel deep cup pistons to minimize heat transfer from the .30" thick pad to the brake fluid while employing high temperature square piston seals to control piston retraction. Internal crossover brake fluid passages eliminate the use of external crossover tubes. The PS-1 fits rotors with diameters ranging from 6.00" to 9.00", and thickness sizes from .15" to .20".

PART #	DESCRIPTION	PRICE
120-5453	Right Hand	\$89.20
120-5456	Left Hand	\$89.20
150-4091-K	Sintered Metallic Pads	\$45.72

FRICITION PAD TECHNICAL INFORMATION

Wilwood brake pads are available in a wide variety of compositions to meet the high performance demands of racing disc brake systems. Dimensionally, they are also inter-changeable with other caliper manufacturers such as CNC, JFZ, etc.

PolyMatrix "E"

- Medium friction compound with the highest effective range in the medium temperature pad group.
- Smooth engagement with consistent response from a flat torque curve throughout its entire effective temperature range.
- Best overall wear properties in the medium temperature pad group.
- Beds quickly and provides fast response without excessive abrasion on iron or steel rotors.

"Smart Pad" BP-10

- Medium friction compound with the low noise and low dust of a street performance compound and the increased friction characteristics of a semi-metallic race compound.
- Smooth engagement with consistent response from a flat torque curve throughout its entire effective temperature range.
- Good low to middle temperature wear rates.
- Beds quickly and provides fast response without excessive abrasion on vented iron rotors.
- Medium friction compound with the low noise and low dust of a street performance compound and the increased friction characteristics of a semi-metallic race compound.

Sintered Metallic

- Medium to high friction compound with a steadily increasing torque curve as temperatures rise.
- Good wear and friction properties with high fade resistance for special applications where intermittent high temperature spikes are observed between periods of moderate temperature braking.

Purple "Smart Pad" Aluminum Rotor

- For aluminum rotors, only available for Dynalite Single.

IMPORTANT TECH TIP

PAD BEDDING

Friction pads will offer increased performance, wear longer, create less dust, and reduce rotor wear when properly bedded in.

PAD BEDDING PROCEDURE

Pump brakes at low speed to assure proper operation. On race track or other safe location, make a series of hard stops until some brake fade is experienced. Allow brakes to cool completely, this process will burnish the brake pads, offering maximum performance.

BRAKE ACCESSORIES

CALIPER REPLACEMENT PARTS

BRAKE KITS

FRONT MEDIUM DUTY DRAG RACE KIT

Designed for cars up to 2800 lbs, these kits combine the new generation Forged Dynalite calipers with an innovative design, steel alloy rotor, and an aluminum intermediate rotor plate. This configuration generates big stopping power with minimum weight and maximum reliability against heat distortion. Four wheel disc brakes will provide the ultimate performance. Each hub is drilled for 5 x 4-1/2" and 5 x 4-3/4" bolt pattern. Set of ten 1/2"-20NF Grade 8 studs included.

Shown with optional drilled rotor.

FRONT HEAVY DUTY PRO SERIES BRAKE KIT

Wilwood's unmatched performance is combined with classic, high tech styling in the ultimate kit for street rods, muscle cars, hot rods, and heavy weight drag cars. These systems stop hard, withstand severe heat, and can save as much as 35 lbs of unsprung and rotating weight over OEM components. Polished caliper kits are also available to catch the eye and win the favor of the most discriminating enthusiasts. Each hub is drilled for 5 x 4-1/2" and 5 x 4-3/4" bolt pattern. Set of ten 1/2"-20NF Grade 8 studs included.

Shown with optional polished caliper.

Most kits available with polished or black anodized calipers.

(1) Mid 1965 and earlier models require spindle modifications.

(2) Caliper brackets not included.

(3) Disc spindles with 11" rotor only.

(4) Factory caliper mounting ears and backing plate bolt holes must be modified.

(5) Backing plate mount holes must be redrilled and tapped on disc brake spindles.

(6) Front track width becomes approximately 1" wider per side. 15" disc brake offset wheels required.

(7) Standard brakes only, no Z-11 or HD.

(8) Late spindle uses a torque nut to retain hub and bearing.

(9) Spindle must be modified.

(10) With O.A.I. drum spindle.

Front Medium Duty Drag Race Kit Notes

Most kits available with polished or black anodized
(A) Disc spindles with 11" rotor only.

(B) Factory caliper mounting ears and backing plate bolt holes must be modified.

(C) Backing plate mount holes must be rechilled and tapped on disc brake spindles.

(D) Late spindle uses a torque nut to retain hub and bearing.

(E) Spindle must be modified.

(F) Mid 1965 and earlier require spindle modifications.

(G) With O.A.I. drum spindle.

REAR AXLE KITS

DYNALITE REAR AXLE KIT

This kit uses one Forged Dynalite caliper per wheel and is designed for cars with four wheel brakes. For dragsters or other cars that rely on rear brakes only, a dual caliper kit is recommended. All kits are for .500" wheel studs, unless otherwise noted, and feature three 5-bolt patterns 4 1/2", 4 3/4", and 5" bolt circle.

* Kits fit the small bearing 12 bolt housings used in Camaros, Chevelles, and Novas. It will also fit some 10 bolt housings, and rear axles used in other GM cars. This kit will not fit the large bearing housings used in full size GM cars and light trucks.

KITS INCLUDE: Calipers, brake pads, rotors, hats, brackets, and all mounting hardware.

Shown with optional drilled rotors. Add "D" to end of kit part number for this option. Additional cost is **\$21.00/ set**.

REPLACEMENT REAR ROTOR

We stock all the replacement parts to keep your Wilwood brake system stopping. Replacement rear rotors are 11.44" dia. x .35" thick.

160-1601

TECH TIP

Custom built or narrowed rears may use axle bearings and housing flange bolt patterns different from the original equipment. Consult the rear housing flange chart (next page) to identify the correct housing flange and measure the axle flange offset accurately. **Brake kit orders must be based on housing flange and axle flange offset, not the make of the rear end center section.**

HOUSING FLANGE IDENTIFICATION CHART

IT IS IMPORTANT TO PROPERLY IDENTIFY THE CORRECT REAR AXLE BRAKE KIT FOR EACH SPECIFIC APPLICATION

To order the correct Wilwood Rear Axle Brake kit for each application, refer to the chart to the right to determine the exact housing flange and axle flange-to-housing flange dimensions. Check the following measurements on the rear end assembly: outside bearing diameter, housing flange, stud pattern, bolt circle on axle flange, and dimension from face of axle to face of housing flange (see Axle Flange Cross Section diagram in the margin to the right). These measurements are critical to ensure proper alignment of the rotor to the caliper and should match the offset dimension shown in the specific kit's application chart. Custom built or narrowed rears may use axle bearings and housing flange bolt patterns different from the original equipment. Consult the rear housing flange chart on this page to identify the correct housing flange and measure the axle flange offset accurately. Brake kit orders must be based on housing flange and axle flange offset, not the make of rear end center section. It is critical to correctly measure the dimension from the face of the axle to the face of the housing flange. Match this measurement to the offset dimension on the application chart to find the correct kit for your vehicle.

COMMON AXLE HOUSING ENDS

CALIPER MOUNT BRACKETS

REAR AXLE KITS

DUAL DYNALITE REAR AXLE KIT

Dual Dynalite Rear Kit uses two calipers per wheel to provide the extra braking power needed for fast dragsters and other cars that rely mainly on rear brakes for stopping power. If the current single caliper system is plagued with excessive component wear from heat or marginal stopping power, a dual caliper system is the best choice. Dual caliper rear systems will provide confident braking and extended component life from reduced stress and lower operating temperatures at the calipers, brake pads, rotors, and hats. Dual Dynalite systems use the same quality components as the single Dynalite kits and provide unmatched performance with the lowest possible rotating and unsprung weight.

KIT INCLUDES: Four calipers, brake pads, rotors, dual mount brackets, all mounting hardware.

Shown with optional drilled rotors, add "D" to end of kit part number for this option, additional cost is **\$22.32/set**.

PART #	DESCRIPTION	STUDS	OFFSET	PRICE

INSTALLATION NOTE: Dual caliper kits require more master cylinder volume than single caliper kits to work properly

Wilwood Dual Caliper kits are now supplied with special dynamic mount aluminum hats.

REAR HEAVY DUTY PRO SERIES BRAKE KIT

Pro Series rear brake kits provide absolute braking performance for a wide variety of performance street, custom show, and competition cars. These kits combine the powerful clamping force of the new generation 4 piston Forged Dynalite calipers with the added performance and cooling capacity of competition style vented iron alloy rotors. Kits are available with or without parking brakes and anodized or fully polished for the ultimate finish to your wheel and suspension detail.

Shown with optional polished caliper.

Shown with parking brake and polished caliper option.

KITS INCLUDE: Calipers, brake pads, vented rotors, hats, and mounting hardware.

BRAKE KITS

DIRECT SPINDLE MOUNT FRONT BRAKE KIT

For funny cars and other lightweight drag cars with direct spindle mount front wheels (Hat has 5 holes on 4-3/4" bolt circle). This kit is designed for cars under 2400 lbs. that are also equipped with rear disc brakes. This system combines confident performance with classic styling in a truly compact, weight saving design. Requires welding of mount tabs on spindle for caliper bracket.

KITS INCLUDE: Caliper with brake pads, hats, and rotor bolt kit.

Add "D" to end of kit part number for drilled rotor option.
Additional cost is **\$21.00/set.**

10" dia. x .25" thick, five 3/8" holes on 5" bolt circle

* Requires redrilling and tapping top caliper bracket mounting hole.

** Disc spindles require removal of factory caliper mounting ears.

***With O.A.I. drum spindle.

CABLE ACCESSORIES

TeleflexMorse

Positive, smooth operating TeleflexMorse cables are sealed and internally lubricated. These cables are perfect for any cable operated application such as throttle linkages, shifter hookups, fuel shut-offs, and parachute releases.

To determine the proper length for your application, measure the cable length between the attaching points. Be sure to use a flexible rule to snake through the cable route. Order by overall length at attaching points

CLIP TYPE CABLE-STANDARD & SUPREME XTREME

Clip mounted, these cables provide 3" of travel and require the choice of mounting hardware listed below. Available in either standard type (solid wire core) or supreme xtreme type (multi-strand core). The supreme xtreme cable is more flexible and capable of tighter radius bends with less resistance. Both styles feature 10-32 NF threaded rods and the housing measures .343" dia.

OVERALL LENGTH	STANDARD CABLE	PRICE	SUPREME XTREME CABLE	PRICE

EXHAUST / INTAKE

U-BEND

These mandrel bent mild steel and 304 stainless steel pieces make fabrication of your own custom header or intake system a simple task. Features 6" straight legs.

DONUT

Perfect for custom exhaust systems or intake manifold fabrication where tight bends are required. May be cut to accommodate any degree of bend necessary. The inner seam requires finish welding after cutting.

EXAMPLE
Ideal for super-tight areas.

Optional Defrost Tube

HI-VELOCITY 4 BARREL MANIFOLD

This volumetric efficient smooth radius design outflows cast aluminum manifolds by 10%. High velocity eliminates fuel puddling resulting in a cleaner mixture with improved throttle response. Lightweight sheet aluminum construction features quality tig welding and micro-polishing. Restrictive adapters are not required. Optional defrost tube may have warm water or oil circulated through it to reduce condensation in cool or damp running conditions.

PERFORM-O-FLEX HOSE

Earl's Perform-O-Flex stainless braid-protected synthetic rubber hose is premium quality racing hose depended on by the top racing teams of every professional sanctioning body in the world. The hose is flexible at temperatures ranging from -40° to +300° F. Perform-O-Flex hose is intended for use with Swivel-Seal, Auto-Fit, and Econ-O-Fit ends only.

PART #	SIZE	I.D.	O.D.	MAX. OPERATING PRESSURE	PRICE PER FOOT

730016	1-1/2"	-18 & -20 PERFORM-O-FLEX	\$16.76

ECON-O-FIT HOSE END

The appearance of the Econ-O-Fit hose end dresses up any installation. The specially designed interior grooving prevents the hose from "hanging up" on the clamp and assures proper placement of the worm gear type clamp. The Econ-O-Fit hose ends are quality machined from aluminum alloy and anodized red for durability. To be used with Perform-O-Flex hose.

AUTO-FIT HOSE ENDS

AUTO-FIT HOSE ENDS

Auto-Fit ends provide the reliability and appearance of Swivel-Seal, but are less expensive. The Auto-Fit nipple is pushed into rather than threaded into the hose. The hose is compressed between the nipple and the socket, sealing at the barbs. Hose retention is positive (the same as Swivel-Seal) and there is no spiral path for possible leaks.

SWIVEL-SEAL HOSE ENDS

Earl's patented Swivel-Seal hose ends incorporate the finest design qualities of any hose end made. The Earl's Swivel-Seal hose end includes a feature not found on other hose ends - **adjustability after assembly**. It is this feature that makes Earl's patented Swivel-Seal hose end the only choice for true high performance applications. Available in anodized red and blue finishes.

TEFLON TAPE

Every time you install a tapered pipe thread fitting it is essential to use some form of anti-seize to prevent galling. Earl's teflon tape is easy to use, not messy, and forms a positive seal.

176016	16	5	\$6.44

STAT-O-SEALS

Consists of a synthetic rubber "O" ring mechanically locked to the I.D. of an aluminum washer. When tightened, the "O" ring is compressed forcing the sealing surfaces around the bolt shank. They will form a positive seal over a temperature range of -85° F. to +450° F. They provide the advantages of an "O" ring type seal without the necessity of machining "O" ring grooves into the part. 2 seals per pkg.

PART #	I.D.	PRICE
178006	3/8"	\$3.98
178007	7/16"	\$3.98

FUEL TIP OVER VALVE

An excellent safety device that can be installed in any fuel cell or tank. Serving as a non-restrictive vent, this tip over valve check ball closes on a rollover to prevent fuel from escaping.

PART #	DESCRIPTION	PRICE
834-008-11	#8 AN MALE THD.	\$23.95

CARBURETOR & FUEL PUMP ADAPTERS

These specialty aluminum adapter fittings simplify the connection of AN hose assemblies to carburetors, power steering or fuel pumps.

OIL THERMOSTAT

To insure quick warm up under cold weather conditions, use our oil-stat. This uniquely designed product controls oil temperature like a thermostat controls water temperature in a radiator.

HARD LINE

STAINLESS HARD LINE

This 304 stainless steel hard line is annealed making it very easy to bend and work with. Finished installation is sanitary, compact and durable. May be coupled to Speed Flex line when movement is required. Comes in 20' lengths, may be coiled or cut into 8' lengths + drop for UPS shipment. Sold by the foot. **Note: 1/2" can not be coiled.**

SPEED FLEX HOSE

The stiffness of the Teflon liner, combined with the resistance of the stainless steel braided outer cover dramatically reduces brake line expansion under pressure. This results in a much firmer and more controlled brake pedal. Applicable for medium pressure hydraulic systems, flexible brake and clutch, or instrument lines where extreme pressure is necessary. The continuous operation temperature range is -65° to +450° F.

PART #	FITTING SIZE	I.D.	MAX. OPERATING PRESSURE	PRICE PER FOOT

600004	4	3/16"	2000 PSI	\$4.07

SPEED FLEX PRE-ASSEMBLED HOSE

Saves time and money! Earl's factory assembled hoses made from Speed Flex Teflon Hose, ideal for brake, clutch, instrument and injection hoses. Each hose is pressure tested to 4,000 psi. Maximum operating pressure: 2,000 psi. Hoses listed are #3 with #3 AN female swivel on both ends and #4 hose with #4 AN female swivel on both ends. These individual hose assemblies are not certifiable to D.O.T. standards, therefore, they are to be used on off-road applications only

BRAID SEPARATOR TOOL

In order to insert the "olive" into Speed-Flex Hose, the stainless protective braid must be separated from the teflon liner. This can be more difficult than it sounds. Earl's braid spreader solves the problem and eliminates the tiresome probability of poking holes in your fingers. In use, the tool is simply inserted into the cut end of the hose and pushed, spreading the braid. The olive is then placed on the tool mandrel, pushed over the hose liner, and under the braid until the liner bottoms against the shoulder of the olive. The tool mandrel is double-ended; one for -3 hose and one for -4. The handle contains a recess for storage of spare olives.

PART #	DESCRIPTION	PRICE
007	BRAID SEPARATOR TOOL	\$28.17

THREAD SIZES

For your convenience we have included the actual size silhouettes and related sizing information to assist in selecting the correct fitting for your plumbing application.

“AN” THREAD SIZES

“AN” (Army-Navy) sizes were established by the aerospace industry years ago and were designated O.D. of the rigid metal tube that each size fitting is used with. (The chart to the right will clarify this point).

The numbers assigned equate to the outside diameter (O.D.) of the tubing in 1/16”. Since tubing and hoses are to be found with assorted wall thicknesses, we can now understand that the designated size number does not necessarily tell you how large the inside diameter will be. (For example, the inside diameter of an Earl’s size 6 hose end is nearly as large as the inside diameter of some other manufacturers’ -8 hose ends).

Each AN size number has its own standard thread size which can be seen in column three of the chart. Again, these are the same thread sizes that have been used in aircraft and industrial applications for many years. **All fittings have a 37° flare.**

AN SIZE	METAL TUBE O.D.	THREAD SIZE
2	1/8"	5/16-24 SAE
3	3/16"	3/8-24 SAE
4	1/4"	7/16-20 SAE
5	5/16"	1/2-20 SAE
6	3/8"	9/16-18 SAE
8	1/2"	3/4-16 SAE
10	5/8"	7/8-14 SAE
12	3/4"	1-1/16-12 SAE
16	1"	1-5/16-12 SAE
20	1-1/4"	1-5/8-12 SAE
24	1-1/2"	1-7/8-12 SAE
28	1-3/4"	2-1/4-12 SAE
32	2"	2-1/2-12 SAE

“NPT” THREAD SIZES

We can now leave AN thread sizing and head on to the next category which is N.P.T. (National Pipe Threads). National Pipe Threads are the next most popular thread size used in “Competition Plumbing”. We can actually find a resemblance between the size call outs and the I.D. (inside diameter) of the fitting. The outside silhouettes shown here will help verify your fitting selection.

PIPE THREAD SIZE	THREADS PER INCH	THEORETICAL I.D. OF FTG.	CLOSEST AN FTG. SIZE

1-1/2"	11-1/2	1-1/2"	24
2"	11-1/2	2"	32

Brake lines are critical items. The potential penalties for improper assembly are severe. Although there is nothing complicated about the procedure and no special tools are required, extreme care must be used in assembly. We strongly recommend that the following procedures be used.

PERFORM-O-FLEX HOSE WITH SWIVEL SEAL HOSE ENDS

1. Cut hose to required length.
 - a. Measure distance between parts of adapter fittings along the path that the hose run will follow - allowing for bend radius, hose end length and offset to obtain length and hose required.
 - b. Cut the hose square with a radiac wheel or a sharp 32 teeth per inch hacksaw blade. It is necessary to wrap it tightly with masking tape before cutting and to cut through the tape. This helps to prevent the stainless wire braid from fraying.
 - c. Trim any frayed end of the braid with a sharp pair of metal snips or diagonal cutters and remove the tape.

2. Place the socket in a vise and insert the end of the hose into the socket until the hose butts against the bottom of the threads provided for the cutter. Gently pull the hose back until there is a 1/16" to 1/8" gap between the end of the hose and the bottom of the socket - mark hose at bottom of socket with a felt pen so that you can detect any tendency of the hose to be pushed out as you complete the assembly.

3. Lubricate the inside of the hose, the cutter threads and the socket threads. Just about any kind of clean oil will do but we prefer to use an anti-seize compound on the threads. Place the nipple in a vise. Flex muscles.

4. Push the hose and the socket onto the nipple until the socket threads can be started on the cutter. Start the threads and go as far as you can by hand. Depending on the size of the hose, some force may be necessary in this part of the operation.

5. To complete the assembly it doesn't matter whether the nipple or the socket is held in the vise. Holding one or the other in the vise and using a suitable wrench on the other, tighten the socket onto the cutter threads until the socket is within .060" of bottoming on the nipple. Do not use an adjustable or over-size wrench or you will damage either the nipple or the socket.

6. Check the mark that you made on the hose in step 2. If the hose has backed more than about 1/16" out of the socket as you assembled it, curse and return to step 3.

7. Clean the hose and the hose ends with CLEAN solvent.

8. It is most unlikely that you will have available any method of pressure checking the assembly before it is installed. Before letting the assembly out of your sight, check the assembly by running the system at full pressure while you observe the hose, hose ends and adapters for leaks.

SPEED FLEX HOSE WITH SPEED SEAL HOSE ENDS

1. Cut the hose to the required length. We recommend the use of a radiac wheel but it can be done satisfactorily with a 32 teeth per inch hacksaw blade. In either case, the hose must be tightly wrapped with masking tape and the cut made through the tape. Do not cut Speed Flex hose with a chisel, snips, pliers, or a shear as these may crush the teflon sleeve.

2. Deburr the Teflon and trim any loose ends of braid with sharp snips or diagonal cutting pliers, and remove tape.

3. Install the socket on the hose with the threaded end of the socket toward the cut end of the hose. This will be a lot easier and you will end up with fewer holes in your hand if you clamp the socket in a vise. Push socket on well beyond end.

4. Place the hex portion of the nipple in the vise. Insert the end of the hose onto the nipple and bottom the hose against the chamfer seat of the nipple with a rotary motion of the hose. This will size the I.D. of the Teflon tube and start the necessary separation of the tube from the braid.

5. Separate the braid from the O.D. of the Teflon Tube with a small screwdriver, #007 tool, or a scribe. Be careful not to scratch or nick the Teflon.

6. Install the sleeve between the braid and the Teflon tube. Make sure that none of the braid is trapped between the Teflon and the sleeve. Bottom the tube against the shoulder of the sleeve and make sure that the sleeve is inserted square.

7. With the nipple held in the vise push the hose and the sleeve onto the nipple until the sleeve bottoms. Remove the hose and make sure that the Teflon tube is still bottomed against the shoulder of the sleeve and that the sleeve is still square.

8. Push the hose and sleeve back onto the nipple and bottom against the chamfer. Start the socket onto the nipple threads and hand tighten.

9. Place the socket in the vise and complete the assembly by tightening the nipple onto the socket with a wrench until the gap between the face of the socket and the hex of the nipple is .023" to .046" - use a feeler gauge.

10. Blow the assembly clean and pressure test before running the car.

ELECTRICAL

STARTER RELAY

This starter relay permits the vertex magneto to be controlled by a standard automotive type ignition switch - making the extra ground switch unnecessary.

PART #	DESCRIPTION	PRICE
V-925010	STARTER RELAY	\$41.56

MAGNETO IGNITION WIRES

Universal red wire set includes eight ignition leads with spark plug boot on one end - other end for insertion into Vertex cap. Wire core is preferred for magneto applications. Fits both OXC and OAC versions.

RACE CAR WIRING ASSEMBLY

This 8-circuit wiring harness with pre-terminated fuse block features heavy duty 30 amp relays for circuit applications including:

- Start
- Ignition
- Electric Fuel Pump #1
- Lights
- Electric Fan
- Electric Fuel Pump #2
- Accessory Circuit
- Electric Water Pump

PART #	DESCRIPTION	PRICE
P50001	RACE CAR WIRING ASSEMBLY	\$393.95

CHARGING SYSTEM SHUTDOWN RELAY KIT

Even with the master disconnect turned off, your engine may continue to run due to alternator feedback. This relay is installed between the alternator and the battery. When master disconnect is switched off, the relay is de-energized and stops current flow to the ignition system. Kit is supplied with all installation hardware and easy to follow installation instructions.

PART #	DESCRIPTION	PRICE
P50103	CHARGING SYSTEM RELAY	\$55.98

12 CIRCUIT FUSE CENTER

This street legal fuse center, designed and built especially for racing, locates the following fuses in one convenient location:

- Brake Lights
- Coil
- Dome Light
- Electric Fan
- Electric Fuel Pump
- Electric Water Pump
- Emergency Flashers
- Headlights
- Horn
- Instruments
- Radio
- Turn Signals
- Wipers

Features 10 gauge lead-in wire for powering-up circuits

PART #	DESCRIPTION	PRICE
P50101	RACE CAR FUSE CENTER	\$197.67

LIGHTED AND FUSED SWITCH PANELS WITH COMPLETE WIRING SYSTEMS

Designed for racing applications, these panels feature lighted rocker switches and a heavy-duty, non-reflective, lightweight metal housing. Each switch function is screen-printed for quick visual reference. All circuits are individually fused with automotive blade-type fuses mounted on bottom of housing for quick testing and changing. May be dash or roll bar mounted.

PART #	HEIGHT	WIDTH	DEPTH	# OF SWITCHES	SWITCH FUNCTIONS	PRICE

* For safety, these switches are only powered on when the ignition is on.

UNIVERSAL FUEL PUMP RELAY KIT

Prevents voltage drops, while maintaining constant fuel pump pressure and saves electrical system damage from amperage overloads. Suggested for street applications and a must for racing

PART #	DESCRIPTION	PRICE
P50102	ELECTRIC FUEL PUMP RELAY	\$40.14

FUSED VERTICAL DRAGSTER SWITCH PANEL

With space in the dragster cockpit at a premium, the Vertical 6 Switch Dragster Control Center is the perfect solution. With a wafer-thin 1-1/2" width (15-1/2" length/2-1/2" depth), this self-contained control center mounts in virtually any position and provides immediate control of connected electrical functions. Switch functions include:

- Start
- Ignition
- Fuel Pump
- Water Pump
(fan & water pump/center off/water pump only)
- Accessory
- Accessory

Standard features include color-coded rocker switches that light up (except start) when pushed and screen printing on all switch functions on top and bottom for quick visual reference and to provide for a greater number of mounting configurations. Designed for easy hose clamp mounting (clamps not supplied), either vertically or horizontally, on the frame or rollbar.

PART #	DESCRIPTION	PRICE
P50506	FUSED DRAGSTER 6-SWITCH PANEL	\$358.56

REPLACEMENT ROCKER SWITCHES

These replacement rocker switches work for all Painless switch panels or for special applications requiring the Painless sleek looking rocker switch. Available with or without lighting.

CIRKIT BOSS FUSE CENTERS

CirKit Boss Fuse Centers provide the ideal cost-effective solution when additional electrical circuits are required, or accessory equipment requires ignition hot and constant hot capabilities. **CirKit Boss is the only add-on fuse center available in the marketplace with ignition hot capabilities.** This safety feature ensures that your add-on circuits will only work if the ignition key is on.

PART #	# OF CIRCUITS	TYPE OF CIRCUITS	PRICE
P70103*	3	2 IGNITION HOT 1 CONSTANT HOT	\$52.67
P70107*	7	4 IGNITION HOT 3 CONSTANT HOT	\$66.59

* Ignition hot circuits are hot only when the key is turned on. Constant hot circuits are always hot.

CIRKIT BOSS WITH WEATHERPROOF KIT

These new cirkit bosses offer the same features as the standard cirkit boss kit with weather sealed back and rubber fuse boot for additional protection.

4-CIRCUIT FUSE CENTER

This universal Fuse Block is supplied in easy-to-assemble kit form, and can be used for just about any automotive-type electrical application. Ideal for in-line wiring applications such as trailer wiring, or when adding vehicle accessories. Uses blade-type automotive fuses (not supplied), up to 30 amps.

BOOST MEMORY KIT

This compact kit accurately records maximum reading on all boost and blower gauges, this allows you to concentrate on driving and not watching the gauge. Kit is easily reset and is not influenced by vibration or fuel vapor. All fittings are 1/8" NPT.

PART #	DESCRIPTION	PRICE
C76-165	BOOST MEMORY KIT	\$46.25
C76-166	RELIEF VALVE	\$23.80
C76-167	CHECK VALVE	\$20.60

PRO COMP SERIES

2-5/8" MECHANICAL & ELECTRICAL GAUGES

Pro Comp liquid-filled mechanical gauges are designed for racing applications with extreme vibrations or violent pounding. The bourdon tube gauge mechanism is encased in a special dampening fluid that not only provides steadiness to the pointer but also adds longer life to the instrument. Pro Comp electric gauges include a rugged air core meter movement and are the ideal choice for applications where routing electric wires are required.

GAUGES

ULTRA-LITE SERIES

2-1/16" & 2-5/8" ULTRA-LITE GAUGES

All aluminum construction greatly reduces the weight of these premium race gauges, making them the hottest new instruments in the racing industry. A clear anodized aluminum face dramatically displays the "easy-to-read" red pointer. Senders included with electrical gauges.

GAUGES

SPORT-COMP SERIES

5" SHIFT-LITE TACHOMETERS

When critical shifting is a priority, the Sport Comp Shift-Lite tachometers are the answer. These tachs feature an advanced air core meter movement, which provides accuracy and quicker response. They also include the exclusive rubber-lined shock-strap for vibration-free readings. A bright amber shift-lite signals any pre-selected rpm to notify the driver to shift.

The "Dial-In-Exactness" feature utilizes the tach's fluorescent red pointer to indicate the chosen rpm. By turning a set knob on the tach face the pointer sweeps up or down until the preferred rpm is selected. The rpm can be checked at anytime by simply switching the knob to Set. Part #3906 includes peak rpm memory. The driver can switch to Recall on the tach face and the highest rpm achieved will be displayed by the pointer.

The All Silver Sport-Comp 5" Monster Tach is modeled after the popular Ultra-Lite series, but at a more affordable price. The new "Silver" tach includes silver painted steel mounting cups with an anodized aluminum dial, bezel and control shield - matching the Ultra-Lite hot race look!

5" MONSTER & 3-3/4" SPORT-COMP TACHOMETERS

The "Monster" sized tachometers feature an air core meter movement and advanced electronic circuitry that provide accuracy and fast action response. The 5" dial face provides maximum readability and adjustable red line shift marker helps driver to maintain proper shift points. The rubber lined shock mounting strap absorbs the rough pounding and vibrations in sportsman racing. The 3-3/4" tachometers with the classic "tough" appearance has become the standard competition instrument in automotive motorsports. Also available in the 2-5/8" size for Junior Dragsters.

TACHOMETERS

PRO COMP 2 SERIES

5" PRO COMP 2 TACHOMETERS

The Pro Comp 2 tachometers, in traditional black or the all aluminum Ultra-Lite version, include a two-stage shift light. This two-stage light gives the driver two shift settings to allow the first gear a different rpm shift point than the remaining gears. The bright red "Quick Lite" along with the Dial-In-Exactness feature gives instantaneous notice of shift points to provide faster response times during shifts. High and fast revving cars utilize the Dual Range models, which feature a dial face that expands the most critical racing rpm range. Peak rpm Memory Recall reviews the highest rpm achieved during a race.

5" PRO COMP 2 PLAYBACK TACHOMETERS

The Pro Comp 2 Playback tachometers allow the replay to be viewed in both half speed or full speed. Drag race teams can store several runs and review them at their convenience later. Specific features include:

Automatic Record Memory Start "ARMS": The recording is started by the normal release of the line-lock or trans-brake so the LED Playback time clock begins recording at the launch.

Two-Stage Shift Light: Allows for the fast revving first gear to be set at a lower rpm than the rest of the shifts. The LED Quick-Lite along with the Dial-In-Exactness feature gives instantaneous notice.

Four Recordings, 40 Seconds Each Memory: Store up to 4 separate runs up to 40 seconds each.

Time Elapsed Clock: Large bright LED indicates time elapsed in .01 second increments during the race or Playback.

Printer Output Capability: With the use of model 9140 Printer Interface, listed below, the recording can be downloaded to a printer.

Peak RPM Control: The highest rpm that occurred can be viewed both during the race or Playback.

Remote Control Module: An optional 8' extension cable, model 5220, allows the control to be moved so the driver or crew can operate the Playback features in a convenient location.

Start-Stop Control: "Start" and "Stop" control buttons permit Playback rpm and ET to be "Frozen" manually, at any point in the run, for easy reading of data.

Peak Shift Catcher: During playback, the tach can automatically freeze the pointer and LED clock at each gear shift. This allows ample time to record shift points and time between each shift.

PRO-SHIFT LITE

The Pro-Shift is an independently operating shift light with advanced microcircuitry. The shift-point is selected by inserting a precisely calibrated rpm module "Pill" into the unit. The amber light activates when the engine reaches the chosen rpm. A variety of clearly marked rpm module "Pills" are available. **Note: #5340 may be adjusted to 4-6-8 cyl. #5341 & #5342 are fixed to 8-cyl. but may be used on 4 or 6-cyl. by using less chip. For example, 4-cyl. installation with 3,000 rpm chip will "light up" at 6,000 rpm.**

QUICK-LITE SHIFT-LITE

This LED shift light is a replacement option on Auto Meter tachometers with the larger size light or any other accessory RPM triggering device.

TACH PLAYBACK RECORDER & PRINTER INTERFACE

Converts any Auto Meter tachometer, except Magneto type, into a Playback recording device. Full runs can be replayed at full or half speed and viewed on a LED clock (included).

Features include:

- ARMS "Automatic Record Memory Start"
- Time Elapsed Clock
- Four Recordings, 40 Seconds Each Memory Block
- Printer Output Capability

The Printer Interface directly downloads a Playback tach, Playback Recorder, or LTM to a printer without the need for a computer. Printer requirements are for almost any format emulating the Epson 9 or 24 pin dot matrix. Printer will operate with the 9140 Interface.

PRO-CONTROL RPM CONTROL UNIT

Can be used as rev-limiter, air shift activator or nitrous oxide trigger. As rev-limiter, it guards against over-revving by allowing 100% power until reaching the pre-set rpm level. Models without reset button interrupt ignition power for a fraction of a second. Models with reset button are for super-charged (blown) engines. Reset unit shuts off engine completely.

C11574	BLACK	2	\$27.98

Professional parachute engineers with over 25 years of experience design Stroud chutes. The unique tri-form design launches easier and opens softer than older quad-form designs. A complete set of illustrated maintenance and packing instructions are included with every Stroud parachute.

Our standard stocking color is black.

Other color choices of red, blue, white, hot pink, orange, or yellow may be special ordered. Parachute includes pack bag and pilot chute, release cable must be purchased separately (see pg. 125). Also available on every chute listed is the optional launcher upgrade. The Launcher eliminates the need for the pilot chute. These spring loaded or CO2 activated versions are easy to load and provide positive chute deployment.

TECH TIP

Parachutes serve two useful functions:
 1) to slow you down
 2) to keep your car straight.
 Make it a practice of releasing your parachute every time you cross the finish line - if you wait until you are out of control, it may be too late (at 150 mph you will travel 300 ft. before your chute becomes effective.)

DRAG CHUTE CABLE KIT

Kit simplifies installation of cable release system for a parachute. Includes standard 15 foot solid wire core, clip type cable with exposed .075" wire on one end (may be cut to desired length), CNC machined aluminum lever, clevis end, cable mounting hardware, and weld-on tabs. The threaded rod is 10-32 NF and the housing measures .343" diameter.

SHOP ONLINE

WWW.CHASSISSHOP.COM

TERMS: COD orders are accepted on a certified check or money order basis ONLY. If a COD delivery is refused we will require full prepayment for future orders. Certified checks or money orders are preferred to expedite clearance for prepaid orders. Orders not including adequate freight allowance will be sent COD for the balance. Any order under \$50.00 (excluding shipping & COD charges) will be charged an additional \$5.00 for processing.

CREDIT: No personal credit, we accept VISA, MASTERCARD, DISCOVER, and AMERICAN EXPRESS. Orders must be sent to the same name on the card.

DEPOSITS: A 50% deposit is required on custom built and special order merchandise, all deposits are non-refundable.

RETURNS: Return authorization required, 30-day limitation. All merchandise is subject to a 20% restocking fee and must accompany original invoice. No returns on custom built or special order merchandise.

DELIVERY: All merchandise will be shipped the fastest, most economical method, usually UPS Surface, unless you specify Red Label (overnight), Blue Label (2nd day), Orange Label (3 day), or another carrier such as Federal Express. Truck shipments require full prepayment.

CLAIMS: Damage claims must be made with freight carrier. Claims regarding content errors must be reported within 48 hours of receipt of order. Save all packaging for carrier inspection, and notify carrier of damage upon delivery.

INTERNATIONAL ORDERS: Unless restricted by law, we will ship to international customers. Orders outside of the UPS COD shipping territory must include full prepayment with the necessary import/export documents. Orders requiring special or additional documentation will be charged accordingly.

PRICES: Every effort possible will be made to hold published prices. All prices are subject to change without notice. We cannot accept the responsibility for typographical errors in content or pricing.

SPECIFICATIONS: Non-critical specifications are subject to change without notice.

WARRANTY: Neither the seller nor the manufacturer will be liable for any loss, damage or injury directly or indirectly arising from the use or inability to determine the use of these products. Before using the user shall determine the suitability of the product(s) for its intended use and the user shall assume all responsibility and risk in connection therewith.

THE CHASSIS SHOP PERFORMANCE PRODUCTS, INC. will, at its option, repair or replace any product(s) found to be defective due to workmanship or materials for a period of 12 months from the date of purchase. Merchandise should be returned to the CHASSIS SHOP freight prepaid and will be returned to the purchaser FOB Mears, MI.

CAUTION: Products in this catalog which alter your engine performance are "Legal in California Only for Racing Vehicles Which May Never Be Used Upon a Highway." And may not comply with requirements of other state/local laws regarding noise or emission levels.
